*'Style is a way to say who you are without speaking.'*

Wide boards in flooring help even the smallest of rooms appear larger and offer less visible joins which improves a floors overall aesthetic. No expense has been spared in bringing this range to market with a high quality of grade, whilst still appearing as a natural timber in combination with the length specifications to not make any areas be overrun by shorter boards.

Lights to darks, you will find the stain to suit your home or commercial space within this range of colours, all of which are inspired by the latest trends coming out of Europe in major projects and developments.

Whether you are choosing from one of the unique array of UV Cured Lacquer finished stains or letting your installer add their own touches to the RAW board option to be stained and coated on site, the quality Oak Lamellas will provide elegance and grandeur.

A tongue and groove installation method adds value to the product as the method that skilled installers prefer for a better overall result.
